## KEY POINTS

- Today, around 55 percent of the world's population is thought to be living in an urban area or city, with that figure set to rise to 68 percent over the coming decades, according to the UN.
- The study, published Wednesday, also forecast a dramatic upswing in the number of megacities around the world.

## Air pollution in big cities as harmful as smoking

BY DAVID SUDAN WITH DAVID ... | ... | ...

Exhaust from cars are among major pollutants in the big cities of Turkey. (David ...)

Breathing the air in Istanbul is as harmful as smoking 10 packs of cigarettes a year, an expert warned Monday, citing the high level of pollution affecting big cities all across Turkey.

of passengers traveling to Bihar and parts of Uttar Pradesh was seen at the New Delhi Railway station due to the Chhath

## 1: Nesuvislo šaranje po zidovima ili simptom stanja društva?

*Upravljanje i koruptivnost prelijevaju preko svih faseta društva, goli zidovi postaju možda još jedino mjesto plasmana necenzuriranih poruka i street art, a ne proizvoljno sporadično nesuvislo šaranje po zidovima kojega se inače užasavam. Kaže novinarka umjetničke umjetnosti*
