EUROPEAN STABILITY MECHANISM

European Stability Mechanism

Klaus Regling, ESM Managing Director "European Monetary Union"

Rovinj, 6 May 2022 ESM Public

CONTENTS

1 Economic and Monetary Union

2 Crises and reform

Response to Covid-19 pandemic

EMU: what remains to be done

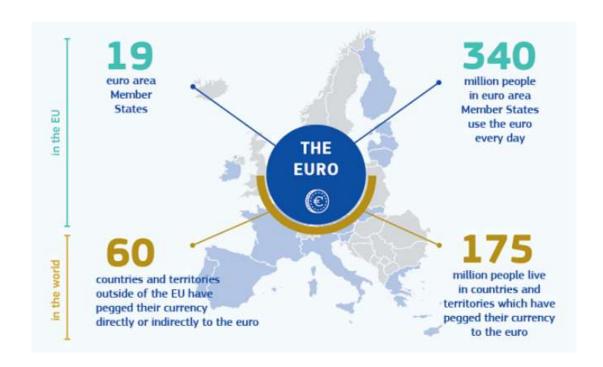

ECONOMIC AND MONETARY UNION

ECONOMIC AND MONETARY UNION (EMU): MORE THAN A CURRENCY UNION

- EMU is the result of an integration process, dating back to the collapse of Bretton Woods system in 1971
- EMU could be established only after a long process of economic convergence
- It has grown originally from 11 to now
 19 countries
- It is not only an economic project, but also a political project

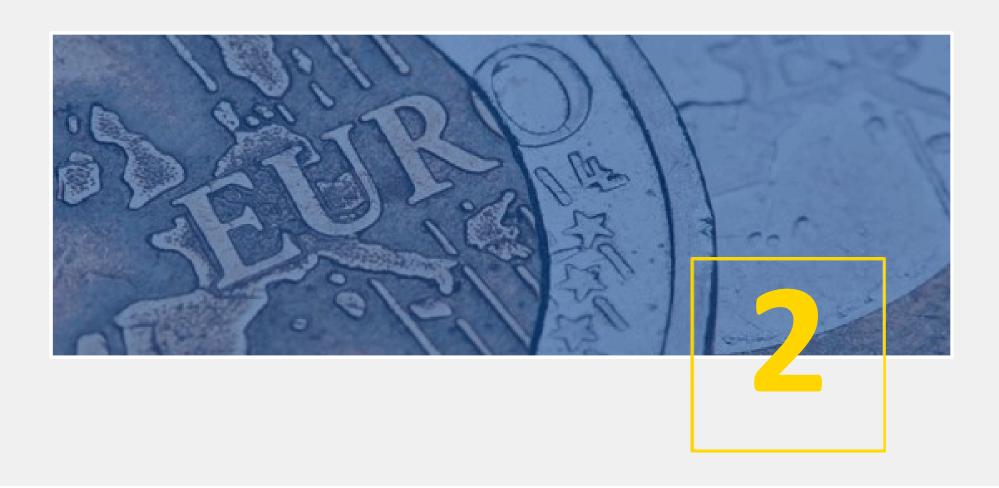

INSTITUTIONAL GAPS WHEN EMU WAS LAUNCHED

- Weak coordination of macroeconomic policy at EU level
- Banking supervision and resolution purely national
- No macroprudential supervision at European level
- Lack of common deposit insurance scheme
- No lender of last resort for sovereigns

CRISES AND REFORM

EUROPE HAD TO CONFRONT TWO CRISES

Global financial crisis 2007-2009

- Crisis in the US real estate market
- Overly abundant liquidity
- Risk premia too low

The euro crisis 2009-2013

- Unsustainable budget deficits and debt levels, loss of competitiveness, real estate bubbles in several Member States
- Gaps in the EU's institutional architecture
- Insufficient supervision of the financial sector
- The unthinkable happened:
 - Several countries lost market access
 - Disintegration of the euro area became a realistic threat

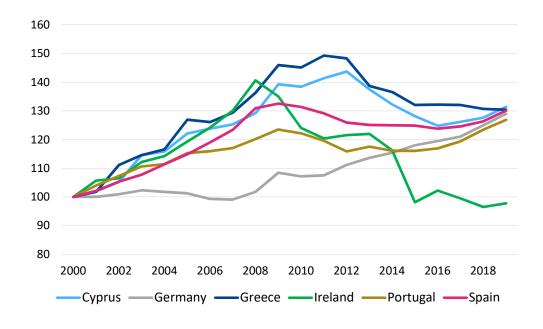

EUROPE'S COMPREHENSIVE RESPONSE TO THE EURO CRISIS

- Adjustment in affected Member States
- Unconventional monetary policy by ECB
- Macroeconomic surveillance broadened and deepened
- Beginning of banking union: Single Supervisory Mechanism (SSM), Single Resolution Board (SRB), Single Resolution Fund (SRF)
- Creation of the two rescue funds (EFSF, ESM)

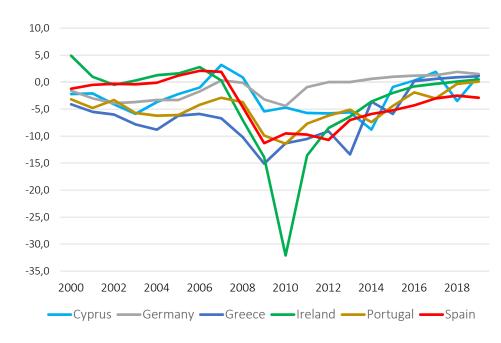

IMPROVED COMPETITIVENESS; SMALLER FISCAL DEFICITS

Nominal unit labour costs (2000=100)

Fiscal balances (% of GDP)

SIGNIFICANT INSTITUTIONAL PROGRESS SINCE 2010

New European supervisory institutions (ESRB, EBA, EIOPA, ESMA)
 European Financial Stability Facility (EFSF)
 European Stability Mechanism (ESM)
 Single Supervisory Mechanism (SSM)
 Single Resolution Board (SRB)
 ESM Treaty revision

EFSF AND ESM PROGRAMMES

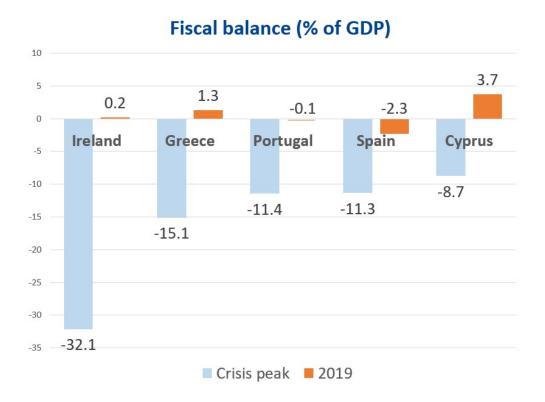

Total amount disbursed by EFSF and ESM:

€295 bn

ALL FIVE EFSF/ESM PROGRAMMES WERE SUCCESSFUL

- EFSF and ESM financial assistance gave programme countries the time to implement vital reforms
- As a result, all programme countries were able to regain market access
- All five countries returned to economic growth, well above the euro area average, which continued until the pandemic crisis broke out

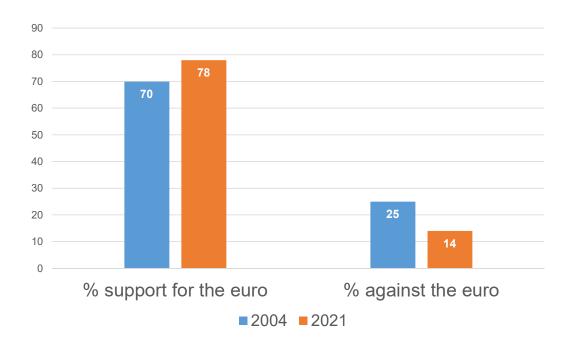

Source: AMECO

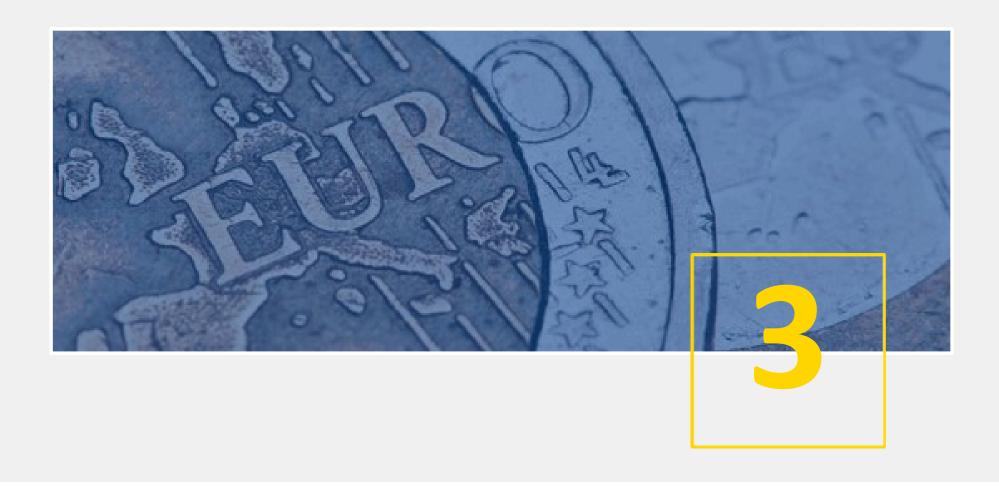

SUPPORT FOR THE EURO IS AT RECORD HIGH

Nearly 80% of respondents in the euro area support the common currency

RESPONSE TO COVID-19 PANDEMIC

IMMEDIATE EU RESPONSE TO THE CORONAVIRUS PANDEMIC

In May 2020, the EU Heads of State committed € 540 billion to fight the Covid-19 crisis

Support for workers

Up to €100bn in loans to EU member states under the **European Commission's SURE** programme in support of national unemployment schemes.

Support for companies

A pan-European **guarantee fund** by the European Investment Bank (**EIB**) of €25bn, which could provide around €200bn of financing for companies, especially SMEs.

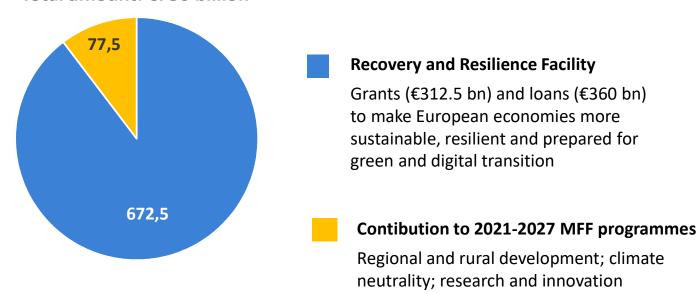

The **ESM**'s **Pandemic Crisis Support**, a precautionary credit line with a total volume of up to €240bn, is available to all euro area countries until the end of 2022 to support healthcare-related costs of up to 2% of GDP.

LONG-TERM EU RESPONSE TO THE PANDEMIC: NEXT GENERATION EU

Next Generation EU recovery package (€ bn)

EMU: WHAT REMAINS TO BE DONE

FURTHER DEEPENING OF ECONOMIC AND MONETARY UNION

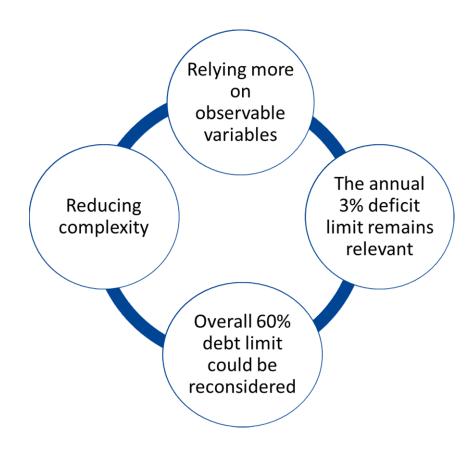

RISK-SHARING IN THE MONETARY UNION

- Risk-sharing is underdeveloped in the monetary union because there is no common revenue or social security system
- Private risk-sharing will be strengthened with banking union and capital markets union
- Public risk-sharing through EU budget, EIB, ESM and Next Generation EU
- New facility for macroeconomic stabilisation?
- Trade-off between private and public risk-sharing

REFORMING THE EU'S FISCAL FRAMEWORK

EU fiscal rules are suspended until 2022. Reform considerations should focus on:

ESM REFORM AND TREATY CHANGE

New tasks for the ESM:

Revised ESM Treaty expected to be ratified in H1 2022

Backstop to the Single Resolution Fund

Enhanced collaboration with the European Commission

Stronger role in preparing and monitoring programmes

New role outside programmes

More effective precautionary credit lines

Promoting debt sustainability
